

Environmental Policy

Hyder Consulting Limited, as a world leading company in engineering and environmental planning and management consultancy, aims to provide a fitting legacy for future generations. To achieve this, we recognise that environmental issues should be integral to the professional services that we offer and that we are committed to achieving, where feasible, environmental best practice.

To facilitate this we will:

- Strive to continually improve our environmental performance and prevent pollution.
- Identify the environmental impacts appropriate to the nature and scale of our activities, products and services.
- Consider the environmental implications of the designs, guidance or advice that we provide to clients, and in the discharge of our project management functions.
- Comply with the applicable legal and other requirements to which the organisation subscribes which relate to its environmental aspects.
- Within the context of this policy, set environmental objectives and targets that will be monitored, audited and reviewed.
- Encourage employees to produce creative, innovative and sustainable solutions to our clients' problems.
- Promote more open exchange of environmental information with our stakeholders.

Rod Stewart
Regional Managing Director
